SUPRA Fork XL

24K Gold plated Fork XL for speaker terminals or other heavy duty terminals. Versatile, allows for straight or 90° angled connection, cable cross sections up to 10mm² and additional banana connection with the supplied adapter (refer to picture). Fork XL internal width 6.5 mm. This is our most copied product world wide, so we guess the design is really good. Rest assured that when it comes to quality, durability and conductivity, our Original Fork XL is the best choice.

Very often used in car, caravan and boat audio, due to corrosion resistance and suitability for the often common narrow terminal access. But we would not stop there, the Fork XL is suitable in a lot of applications.

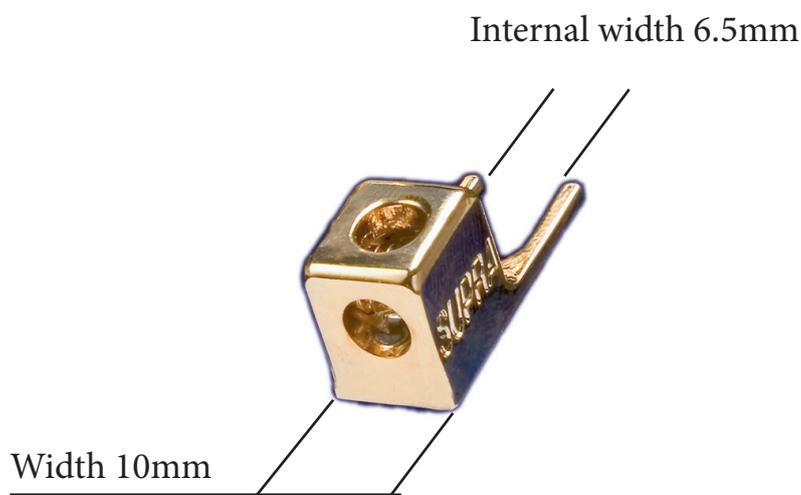

CONSTRUCTION
